From bustling night markets to family kitchens, fried rice has earned its place as the dish everyone turns to for comfort.

Wok-tossed over fierce flames, each grain is smoky, fluffy, and bursting with flavour, a humble classic loved across generations.

In Vietnam, it's a late-night favourite, often paired with pickles or a squeeze of lime for that extra kick.

Did You Know?

In Vietnam, fried rice is often shaped into a round mound or ring before serving! A simple but charming touch that makes it feel extra special.

It's also a popular breakfast dish, with families transforming leftover rice into fried rice and topping it with pickled vegetables and a fried egg.
